

Instructions for Mac Users

Due to limitations with script files, Mac users must use [Fetch Softworks](#) to upload files to [Makepeacerepro.com](#)

1. Navigate your Safari or preferred browser to [fetchsoftworks.com](#)
2. Click on the **DOWNLOAD** option available. (at this time the application will download to your browsers default download location)
3. To start using Fetch, drag the Fetch  icon to the OS Applications Folder
4. With in the Applications Folder, double click on Fetch to open the FTP application. When the Application starts you will want to select the “Try” option and avoid the “Widget” option.
5. When Fetch launches or choose the **File > New Connection** command, the New Connection dialog appears. You must specify the hostname or IP address of the server you want to connect to:

Hostname: <ftp.makepeace.com>

Username: anonymous

Password: anonymous

6. Once connected to the Makepeace FTP, select the “incoming_files” folder.
7. Drag your PDF, TIFF or ZIP file to the incoming file folder

If you have questions please call Makepeace customer service at 617-787-2104
